Subscription Rates 1992

Annual Institutional Subscription Rate (1992): £485.00 (US$880.00). Two-year Institutional Rate (1992/93): £921.50 (US$1672.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request.

Progress in Neurobiology is published as 12 issues per year.

Single parts are available. Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K. Tel: (0865) 794141; Fax: (0865) 60285

At the end of the year the Subscriber will receive, free, the annual subject index.

Second class postage paid at RAHWAY NJ. Postmaster send address corrections to *Progress in Neurobiology*, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

CONTENTS

INTRINSIC MECHANISMS INVOLVED IN THE ELECTROPHYSIOLOGICAL PROPERTIES OF THE VASOPRESSIN-RELEASING NEURONS OF THE HYPOTHALAMUS 1

P. LEGENDRE and D. A. POULAIN, Laboratoire de Biologie Cellulaire, INSERM U 261, Département des Biotechnologies, Institut Pasteur, 28 rue du Dr. Roux, 75724 Paris Cédex 15, France and Laboratoire de Neuroendocrinologie Morphofonctionelle, Université de Bordeaux II, 146 rue Léo-Saignat, 33076 Bordeaux Cédex, France

POSTSYNAPTIC POTENTIATION AND DESENSITIZATION AT THE VERTEBRATE END-PLATE RECEPTORS 19

M. SCUKA and J. W. MOZRZYMAS, Department of Biology, University of Trieste, I-34127 Trieste, Italy and Department of Biophysics, Medical School, P-50368 Wrocław, Poland

MOVEMENT, POSTURE AND EQUILIBRIUM: INTERACTION AND COORDINATION 35

J. MASSION, Laboratory of Functional Neurosciences, C.N.R.S., 31 chemin Joseph Aiguier, 13402 Marseille Cédex 9, France

CALCIUM-INDEPENDENT RELEASE OF AMINO ACID NEUROTRANSMITTERS: FACT OR ARTIFACT? 57

S. BERNATH, University of Pittsburgh, Department of Behavioral Neuroscience, PA 15260, U.S.A.

DEVELOPMENT OF SEROTONINERGIC SYSTEM IN THE BRAIN AND SPINAL CORD OF THE CHICK 93

N. OKADO, H. SAKO, S. HOMMA and K. ISHIKAWA, Department of Anatomy, University of Tsukuba, Institute of Basic Medical Sciences, Tsukuba, Ibaraki 305, Japan, Department of Anatomy, Nihon University, School of Medicine, Itabashi, Tokyo 173, Japan, Department of Neurobiology and Anatomy, Wake Forest University, Bowman Gray School of Medicine, Winston-Salem, NC 27103, U.S.A. and Department of Pharmacology, Nihan University, School of Medicine, Itabashi, Tokyo 173, Japan

NEUROPEPTIDE Y AND NEUROPEPTIDE Y RECEPTOR SUBTYPES IN BRAIN AND PERIPHERAL TISSUES 125

Y. DUMONT, J.-C. MARTEL, A. FOURNIER, S. ST-PIERRE and R. QUIRION, Douglas Hospital Research Centre and Department of Psychiatry, Faculty of Medicine, McGill University, Montréal, Québec, Canada and INRS-Santé, Pointe-Claire, Québec, Canada

THE DEVELOPMENT OF THE CORTICOSPINAL PROJECTION 169

B. B. STANFIELD, Laboratory of Neurophysiology, National Institute of Mental Health, National Institutes of Health Animal Center, P.O. Box 289, Poolesville, MD 20837, U.S.A.

MODULATION OF ION CHANNELS BY SOMATOSTATIN AND ACETYLCHOLINE 203

M. INOUE and M. YOSHII, Department of Physiology, School of Medicine, Fukuoka University, Fukuoka 814-01, Japan and Department of Neurophysiology, Tokyo Institute of Psychiatry, Tokyo 156, Japan

ONTOGENY OF SOME NEUROPEPTIDES IN THE PRIMATE BRAIN 231

M. HAYASHI, Department of Physiology, Primate Research Institute of Kyoto University, Inuyama, Aichi 484, Japan

THE CNS–PNS TRANSITIONAL ZONE OF THE RAT. MORPHOMETRIC STUDIES AT CRANIAL AND SPINAL LEVELS 261

J. P. FRAHER, Anatomy Department, University College, Cork, Ireland

EXPERIMENTAL COMPLEX PARTIAL SEIZURES INDUCED BY A MICROINJECTION OF KAINIC ACID INTO LIMBIC STRUCTURES 317

T. TANAKA, S. TANAKA, T. FUJITA, K. TAKANO, H. FUKUDA, K. SAKO and Y. YONEMASU, Department of Neurosurgery, Asahikawa Medical College, Asahikawa 078, Japan

INTERNEURONAL RELAY IN SPINAL PATHWAYS FROM PROPRIOCEPTORS 335

E. JANKOWSKA, Department of Physiology, University of Göteborg, Box 33031, S-400 33 Göteborg, Sweden

NEUROSTEROIDS: ENDOGENOUS BIMODAL MODULATORS OF THE $GABA_A$ RECEPTOR. MECHANISM OF ACTION AND PHYSIOLOGICAL SIGNIFICANCE 379
M. D. MAJEWSKA, Laboratory of Neuropharmacology, Addiction Research Center, NIDA, Baltimore, MD, U.S.A.

PERIPHERAL AND CENTRAL MECHANISMS OF CUTANEOUS HYPERALGESIA 397
R.-D. TREEDE, R. A. MEYER, S. N. RAJA and J. N. CAMPBELL, Department of Neurosurgery, Applied Physics Laboratory, Department of Anesthesiology and Critical Care Medicine, The Johns Hopkins University, Baltimore, MD 21205, U.S.A.

VENTROMEDIAL HYPOTHALAMIC NEURONS IN THE MEDIATION OF LONG-LASTING EFFECTS OF ESTROGEN ON LORDOSIS BEHAVIOR 423
R. S. COHEN and D. W. PFAFF, Department of Anatomy and Cell Biology, University of Illinois at Chicago, Chicago, IL 60612, U.S.A. and Department of Neurobiology and Behavior, The Rockefeller University, New York, NY 10021, U.S.A.

RELEASE OF GABA AND TAURINE FROM BRAIN SLICES 455
P. SARANSAARI and S. S. OJA, Tampere Brain Research Center, Department of Biomedical Sciences, University of Tampere, Box 607, SF-33101 Tampere, Finland

CEREBROVASCULAR INNERVATION OF SMALL BATS 483
K. ANDŌ , Biological Laboratory, Liberal Arts, Kyushu Sangyo University, Matsukadai, Higashi-ku, Fukuoka 813, Japan

PATTERNS OF SPREAD OF DIFFERENT DEMYELINATING PROCESSES IN THE MYELIN SHEATH 511
M. WOLMAN, Department of Pathology, Tel Aviv University, Sackler Faculty of Medicine 69978 Tel Aviv, Israel

GENE EXPRESSION IN CELLS OF THE CENTRAL NERVOUS SYSTEM 523
Y. TAKAHASHI, Department of Neuropharmacology, Brain Research Institute, Niigata University, Niigata City 951, Japan

A KETAMINE-INDUCED RAT MODEL OF TARDIVE DYSKINESIA 571
L. A. MARCO and R. S. JOSHI, Department of Psychiatry, College of Medicine, University of South Alabama, 3421 Medical Park Dr W. Suite 2, Mobile, AL 36693, U.S.A.

OXIDATIVE DAMAGE AND CEREBRAL AGING 601
C. P. LEBEL and S. C. BONDY, Alkermes Inc., 26 Landsdowne St, Cambridge, MA 02139, U.S.A. and Department of Community and Environmental Medicine, University of California, Irvine, CA, U.S.A.

ANATOMY AND CONNECTIVITY OF INTRASTRIATAL STRIATAL TRANSPLANTS 611
K. WICTORIN, Department of Medical Cell Research, University of Lund, Biskopsgatan 5, S-223 62 Lund, Sweden

INDEX

A23187, effect on neurotransmitter release 67
Abducent nerve, transitional zone 281
Accessory nerve–spinal rootlets, transitional zone 289
Acetylcholine
  activation of cation nonselective channels 218
  desensitization 21
  effect in K^+ channel 211, 213, 215
  positive nerves in bat cerebral arteries 485, 495
  postsynaptic potentiation 20
Acetylcholine receptor, desensitization 23
Action potentials, vasopressin neurons 4
Addison's disease 390
Na^+,K^+-Adenosine triphosphatase, role in neurotransmitter release 67
Adenosine triphosphate, postsynaptic potentiation 20
Adenylate cyclase, Ca^{2+} channel modulation 207
Adrenal gland, neuropeptide Y 132
α-Adrenergic receptors, sympathetically maintained pain 413
A-fiber mechano-heat nociceptors 401
  sensitization 403
Ageing
  GABA and taurine release 471
  oxidative damage in brain 601, 605
Aggression, steroid/$GABA_A$ receptor interactions 388
Airways, neuropeptide Y in 127
β-Alanine, effect on GABA release 461
Alphaxolone, activation of $GABA_A$ receptor 381
Alzheimer's disease
  blood–brain barrier 606
  nerve growth factor 253
  somatostatin in brain 236, 244
Amino acid neurotransmitters, calcium-independent release 57–91
γ-Aminobutyric acid carrier proteins 75
  colocalization with cholecystokinin 246
  colocalization with somatostatin and neuropeptide Y 244
  intracellular compartmentalization 72
  primary afferent depolarization 362
  release from brain slices 455
    effect of calcium chelators 58
    developmental changes 471
    drug effects 467
    effect of excitatory amino acids and agonists 466
    effect of ions 66
    metabolism 459
    methodology 456
    modulation by catecholamines 470
    presynaptic autoreceptors and heteroreceptors 469
    spontaneous 461
    stimulated 462
  release from glial cells 74
    pathological conditions 77
  release from horizontal cells 72
γ-Aminobutyric acid aminotransferase, in brain 459
γ-Aminobutyric acid agonist neurosteroids 381
  behavioural effects 385
  psycho-physio-pathological role 386
  recognition sites at $GABA_A$ receptor 383
γ-Aminobutyric acid antagonist neurosteroids 382
  behavioural effects 386
  psycho-physio-pathological role 386
  recognition sites at $GABA_A$ receptor 383
γ-Aminobutyric $acid_A$ receptors
  GABA release 469
  gene expression 550
  neurosteroids as regulators 381
  psycho-physio-pathological role of neurosteroids 386
  steroid recognition sites 383
γ-Aminobutyric $acid_B$ receptors
  modulation of anomalously rectifying K^+ channel 211
  role in GABA release 469
Aminooxyacetic acid, effect on GABA metabolism and release 459
4-Aminopyridine, effect on neurotransmitter release 71
Amygdala, kainic acid induced seizures 318, 320
Anoxia, effect on neurotransmitter release 77
Anticipatory adjustment of posture 36
  acquisition and adaption 46
  central organization 48
  equilibrium maintenance 38
  organization 42
  stabilization of position 40
  training 47
Anticonvulsants, effect on GABA and taurine release 468
Anxiety, steroid/$GABA_A$ receptor interactions 387
Arm movements 39
Arterial supply to brain, bats 484
Aspartate, effect on GABA and taurine release 466
Astrocytic tissue, transitional zone 265
Astroglial cells
  glial fibrillary acidic protein 544
  S-100 protein 537
Axial movements 38
Axons
  corticospinal 176
    development of spinal arbors 187
    elimination 183
    fasciculation 177
    guidance 178
    myelination 183
    reorganisation of terminals during development 188
  elongation and elimination, primate brain 231–260
  ensheathment, vagal transitional zone 283
  target-deprived, regeneration 620

Baclofen, effect on GABA and taurine release 467, 469

Basal ganglia, postural control 50
Bats, cerebrovascular innervation 483–510
Behaviour, intrastriatal striatal transplants 631
Benextramine 149
Benzodiazepine receptors, in kainic acid-induced limbic seizures 329
Benztropine, effect on ketamine-induced linguo-pharyngeal events 576, 595
Blood–brain barrier
  age-related changes 606
  kainic acid-induced limbic seizures 329
Blood flow
  bat brain 483
  kainic acid-induced limbic seizures 322
Blood pressure
  effect of neuropeptide Y 128
  steroid/$GABA_A$ receptor interactions 389
Blood vessels, CNS–PNS transitional zone 295
Body scheme, posture 43
Bradykinin, hyperalgesia 407
Brain-derived neurotrophic factor 251
Brain-specific proteins, gene expression 528
Brain stem
  neuropeptide Y 143
  onset of serotoninergic cells 109
Burns, hyperalgesia 398, 405

Calbindin 534
Calcitonine gene-related peptide
  immunoreactive nerves, bat cerebral arteries 486, 496
Calcium
  accumulation in kainic acid-induced limbic seizures 329
  dependent cation nonselective channel 218
  dependent plateau potential depolarization 9
  dependent potassium channel 216
  dependent potassium current in supraoptic neurons 13
  desensitization 22
  effect on excitatory amino acid evoked neurotransmitter release 66
  effect on GABA and taurine release 464, 466
  independent release of amino acid neurotransmitters 57–91
  intracellular sources and sodium exchange 73
  neuropeptide Y induced mobilization 129
Calcium channel
  modulation by G proteins 207
  modulation via protein kinases 207
  multiplicity and properties 204
Calcium channel blockers, effect on neurotransmitter release 68
Calcium chelators, effect on neurotransmitter release 58
Calcium currents, supraoptic neurons 10
Capsaicin, cutaneous hyperalgesia 399, 409, 411
Cardiovascular system, neuropeptide Y 128
β-Carotene, in brain 604
Carotid artery, bats 483
Carrier proteins, amino acid neurotransmitters 74
Catecholamines, modulation of GABA and taurine release 470
Cation nonselective channel
  Ca^{2+}-dependent 218
  muscarinic 220
  nicotinic receptor-operated channels 219
Cations, effect on neurotransmitter release 70
Cell death, cerebral cortical neurons 175
Cell volume, role of taurine 473
Central tissue projection 266, 290
Cerebellum
  posture and movement 51
  primate, developmental events in cortex 234
Cerebral ageing, oxidative damage 601–609
Cerebral cortex
  neuropeptide Y 136
  primate, developmental events 233
Cerebrovascular innervation, small bats 483–510
Cervical nodes, transitional zone 292
C-fiber mechano-heat nociceptor 400
  sensitization 403
Chemical irritants, hyperalgesia 399, 401
Chick, development of serotoninergic system 93–123
Chloride, taurine release and cell volume 473
Cholecystokinin, in brain
  correlation with other transmitter systems 246
  distribution in adult 245
  gene expression 531
  immunohistochemistry 245, 246
  ontogeny 245
  radioimmunoassay 245
  receptors 247
Cholinergic drugs, effect on ketamine-induced linguo-pharyngeal events 576, 594
Circadian rhythm, effect on neuropeptide Y 143
Clozapine, effect on ketamine-induced linguo-pharyngeal events 576, 595
CNS–PNS transitional zone, rat 261–316
  astrocytes 265
  central tissue projection asymmetry 290
  cranial nerves 278, 308
  development 303
  morphometry 293
  node density 290
  Schwann cells 272
  spinal nerves 276, 305
  structure 263
  structure–function correlates 296
  supporting tissues 293
Cochlear nerve, transitional zone 281, 308
Cold hyperalgesia 399, 400
ω-Conotoxin
  effect on Ca^{2+} channels 208
  effect on neurotransmitter release 71
Corticospinal axons
  development of spinal arbors 187
  emergence from cortex 176
  fasciculation 177
  guidance 178
  myelination 183
  regeneration 195
  reorganization of terminations during development 188

Corticospinal neurons
  class 171
  cytodifferentiation 172
  generation 169
  migration 171
Corticospinal tract
  axonal elimination 183
  development 176
  experimentally induced changes in development 195
  regeneration 195
Cranial nerves, transitional zone
  development 308
  morphology 278
Creutzfeldt–Jakob disease 516
Cushing's disease 390
Cutaneous hyperalgesia
  characteristics 389
  neuropathic pain 400, 413
  primary, neural mechanisms 402
  referred, neural mechanisms 412
  secondary, neural mechanisms 408
2′,3′-Cyclic nucleotide 3′-phosphodiesterase 527
  gene expression 545

D600, effect on neurotransmitter release 70
Dehydroepiandrosterone sulfate
  aggression 388
  behavioural effects 386
  biosynthesis in brain 380
  depression and anxiety 388
  diurnal cycles 387
  GABA antagonist 382
  memory 389
  personality traits 388
  recognition sites at $GABA_A$ receptor 383
Demyelinating processes 511–521
Dendritic arbors, corticospinal neurons 172
Deoxyribonucleic acid
  cloning of neuron-specific proteins 528
  dopamine D2 receptor 552
  GABA receptors 550
Deoxyribonucleic acid–ribonucleic acid saturation hybridization 523
Depression, steroid/$GABA_A$ receptor interactions 387
Desensitization
  acetylcholine 21
  factors affecting 21
  Katz–Theslett model 26
  mechanism 23
  physiological significance 28
  two-states model 27
Development
  calcium dependency of neurotransmitter release 72
  cholecystokinin in primate brain 245
  CNS–PNS transitional zone 303
  corticospinal tract 176–196
  GABA and taurine release 471
  nerve growth factor in primate brain 252
  neuropeptide Y in primate brain 250
  neurotensin in primate brain 251
  primate brain 233
  serotoninergic system in chick brain 93–123
  somatostatin in primate brain 236
  substance P in primate brain 247
  translation system in brain 526
  vasoactive intestinal polypeptide in primate brain 249
Diazepam, effect on GABA release 468
Dihydropyridines, effect on neurotransmitter release 68
Diurnal cycles, steroid/$GABA_A$ receptor interactions 387
Dopamine, modulation of GABA and taurine release 470
Dopamine- and adenosine 3′,5′-monophosphate regulated phosphoprotein 615, 616, 625
Dopamine D2 receptor, gene expression 552
Dyskinesia, ketamine-induced 571–600

Electrical nerve stimulation, hyperalgesia 399
Enclomiphene 430
End-plate receptors
  desensitization, factors affecting 21
  desensitization mechanism 23
  desensitization model 27
  postsynaptic potentiation 19
Enkephalin, in ventromedial hypothalamic neurons, estrogen induction 431
Enolases, neuron-specific 527, 528
Equilibrium, movement and posture 35–56
Erythromelagia 400
Estrogen
  effects on ventromedial nucleus 426, 431, 438
  facilitation of lordosis behaviour 424
  induced alterations in synaptic morphology in MCG 442
Estrogen memory 429
Excitatory amino acids
  effect on GABA and taurine release 466
  evoked release of amino acid neurotransmitters 66
Excitotoxins, striatal lesions 512, 633
Experimental allergic encephalomyelitis 516

Facial nerve, transitional zone 281
Feedforward stabilization 40
Feeding, steroid/$GABA_A$ receptor interactions 389
Ferritin, antioxidant activity in brain 603
Flexion–extension reflexes, interneurones 357
Food intake, effect of neuropeptide Y 140
Free radicals, cerebral aging 601, 605
Fusimotor neurones 344

Ganglioside GM1, protection against oxidative damage in brain 604
GAP-43 177
Gastrointestinal tract, neuropeptide Y 133
Gene expression in CNS cells 523–569
  cell-free translation system 526
  DNA cloning of neuron-specific proteins 528
  dopamine receptors 552
  GABA receptors 550
  RNA complexity 523
Genetically manipulated cells, intrastriatal striatal transplants 634

Glial cells
influence on development of corticospinal tract 178, 182
neurosteroid biosynthesis 380
role of 73
Glial fibrillary acidic protein 178
gene expression 544
Glial islands 310
Glucocorticoids
effect on reactive oxygen species formation in brain 604
interaction with $GABA_A$ receptor 382
Glucose, utilization in kainic acid-induced limbic seizures 322
Glutamate
effect on GABA and taurine release 466
intracellular compartmentation 72
release in pathological conditions 77
Glutamatergic agents, amino acid neurotransmitter release 65
Glutathione, antioxidant activity in brain 604
Glycoproteins, in PNS myelin 511, 514
G protein
K^+ channel activation 213
modulation of Ca^{2+} channel 207
postsynaptic potentiation 20
Graft–host connections, intrastriatal striatal transplants 616, 624
Gramicidin D, effect on neurotransmitter release 67
Growth hormone, effect on neuropeptide Y on release of 142
Guillain–Barré disease 514

Haloperidol
effect on GABA and taurine release 468, 470
effect on ketamine-induced linguo-pharyngeal events 580
He90481 149
Heart
Ca^{2+} channel 207
K^+ channels 210
neuropeptide Y 128, 131
neuropeptide Y receptors 131
Heat injury, cutaneous hyperalgesia 398, 400, 403, 405
Hepatogenic encephalopathy, neurotransmitter release 77
Hippocampus
kainic acid induced seizures 318
neuropeptide Y 136, 146
primate, development 235
Horseradish peroxidase, retrograde labelling techniques 95, 96
Host–graft connections, intrastriatal striatal transplants 616, 624
Huntingdon's disease 612
animal model 613
intrastriatal striatal transplants 634
5-Hydroxytryptamine
development of immunoreactive cells and fibres in brain 99
development of positive cells in brain stem 109
development of positive cells in spinal cord 100
development of positive fibres in spinal cord 102, 105
positive fibres in specific motor neuron pools 118
Hyperalgesia, cutaneous
characteristics 389
neuropathic pain 413
primary, neural mechanisms 402
referred, neural mechanisms 412
secondary, neural mechanisms 408
Hypoglossal nerve, transitional zone 289
Hypoglycemia, effect on neurotransmitter release 77
Hypothalamus
neuropeptide Y 140
vasopressin neurons 1–17
VMN neurons in effect of estrogen on lordosis behaviour 423–453

Ibotenic acid, striatal lesions 612, 633
Interneurons, proprioceptors 336
distribution 339
dominating input from Ib afferents 347
dominating input from group II muscle spindle afferents 352
functional subdivision 341
Ia inhibitory 343
morphology 340
multimodal input 341
network of neurons 362
patterns of convergence 338
presynaptic inhibition 359
selection 342
target cells 337, 345, 350, 354, 361
Intestine, neuropeptide Y 134
Intraperiod line demyelination 513
Intrastriatal striatal transplants 611–639
afferent connections from host brain 616
behavioural effects 631
clinical perspectives 634
donor tissue dissection and implantation 613
efferents to host brain 625
excitotoxin lesions 612
internal organization 614
Ion channels, modulation by somatostatin and acetylcholine 203–230
Ionic conductances, plateau potential activity 9
Ionophores, effect on neurotransmitter release 67
Ion transport, intestine, effect of neuropeptide Y 135
Iron
in brain, age-related changes 605
reactive oxygen species formation in brain 602
Ischaemia
effect on neurotransmitter release 77
formation of reactive oxygen species 603

Jaw movements 589, 596

Kainic acid
effect on GABA and taurine release 466
induced limbic seizures 317–334
striatal lesions 612

Katz–Thesleff model, receptor desensitization 26
Ketamine-induced linguo-pharyngeal events 571, 593
  effect of cholinergic and anticholinergic drugs 576, 594
  effect of clozapine 576, 595
  effect of haloperidol 580
  effect of lesions 574
  effect of metoclopramide 576, 595
  effect of neuroleptics 574
  role of cortex 575, 594
  tongue contractions 589, 596
  unitary correlates 579, 596
Kidney, neuropeptide Y 132

Leg movements, equilibrium control 39
Leukotriene B4, cutaneous hyperalgesia 408
Limbic seizures, kainic acid induced 317–334
Linguo-pharyngeal events, ketamine-induced 571–600
Lipofuscin, age-related changes in brain 605
Locomotor function, effect of neuropeptide Y 142
Long-term potentiation 21
Lordosis behaviour
  estrogen effects 426, 429, 438, 442
  hormone effects in ventromedial nucleus 426
  long-term facilitation 424, 438
  neural circuit for 424
  neuropeptides in ventromedial nucleus neurons 431
  protein trafficking in ventromedial nucleus neurons 429
  synaptic effects in ventromedial nucleus and midbrain central gray 432
Lumbar nodes, transitional zone 291
Luteinizing hormone, effect of neuropeptide Y on release of 142

Magnesium, effect on excitatory amino acid evoked release of neurotransmitters 60, 66
Magnocellular neurons, passive membrane properties 2
Maiotoxin 77
Major dense line demyelination 513, 515
Memory, steroid/$GABA_A$ receptor interactions 389
Menstrual cycle, steroid/$GABA_A$ receptor interactions 389
Meproadifen 23
Metoclopromide, effect on ketamine-induced linguo-pharyngeal events 576, 595
N-Methyl-D-aspartate, role in ketamine-induced linguo-pharnyngeal events 579, 595
Midbrain central gray, synaptic effects in mediation of lordosis behaviour 432
MK-801, induced linguo-pharyngeal events 578, 595
Monesin, effect on neurotransmitter release 67
Monoaminergic afferents, intrastriatal striatal transplants 620
Motor neuron pools, 5-HT positive fibres 118
Motoneurons
  Ia inhibitory interneurons 345
  Ib interneurons 348
Movement 35
  anticipatory postural adjustment 36, 38
  basal ganglia and premotor areas 50
  cerebellum 51
  coordination with posture 49
  equilibrium 37
Müller cells, GABA release 74
Multiple sclerosis, demyelination processes 516
Muscarinic cation nonselective channels 220
Muscarinic receptors
  Ca^{2+}-dependent K^+ currents 217
  cation nonselective channel 219
  modulation of anomalously rectifying K^+ channel 211
Muscle-specific enolase 531
Myelin
  2′,3′-cyclic nucleotide 3′-phosphodiesterase 545
  proteins 511
Myelin-associated glycoprotein 512, 514
  gene expression 548
Myelinating Schwann cells 272
Myelination, corticosponal axons 183
Myelin basic proteins 512, 514
Myelin sheath, demyelinating processes 512–517

Neostriatum, primate, development 235
Nerve growth factor
  primate brain 251
    correlation with cholinergic system 253
    distribution in adult 252
    ontogeny 252
    receptors 253
  ventromedial hypothalamic neurons 437
Nerve injury, hyperalgesia 400
Neural transplantation 612, 634
Neuritis, demyelination 514
Neuroblastoma cells
  Ca^{2+} channel 206
  neuropeptide Y receptors 147, 150
Neuroendocrine functions, effect of neuropeptide Y 142
Neurofilament protein 527
Neurogenesis, primate brain 233
Neuroleptic-induced perioral movements 589
Neuroleptics, effect on ketamine-induced linguo-pharyngeal events 574, 580, 593
Neurons, elimination, primates 234
Neuron-specific enolases, gene expression 527, 528
Neuron-specific proteins
  cholecystokinin 531
  neuron-specific enolase 527, 528
  14-3-3 protein 535
  spot 35 527, 533
Neuropathic pain 400, 413
Neuropeptides
  onogeny in primate brain 231–260
  synthesis in ventromedial nucleus neurons 431
Neuropeptide Y
  adrenal gland 132
  airways 127

cardiovascular system 128
CNS 135
colocalization with somatostatin 244
gastrointestinal tract 133
immunoreactive nerves to bat cerebral arteries 485, 495
kidney 132
primate brain, ontogeny 250
sigma receptor interaction 151
structure 126
structure–activity relationships 147
urogenital tract 132
Neuropeptide Y receptors
airways 127
antagonists 149
biochemical characteristics 150
cardiovascular system 128, 130, 131
CNS 135, 145
food intake 141
intestinal epithelial cells 135
kidney 132
neuroblastoma cell lines 147
stomach 133
structure–activity relationships 147
urogenital tract 132
Neurosteroids
behavioural effects of GABA-modulatory steroids 385
biosynthesis 380
GABA-agonistic 381, 385
GABA-antagonistic 382, 386
$GABA_A$ receptor interactions 386
recognition sites at $GABA_A$ receptor 383
Neurotensin, primate brain 251
Neurotransmitters
amino acid, Ca^{2+}-independent release 57–91
release in cardiovascular system, effect of neuropeptide Y 130
release in hypothalamus, effect of neuropeptide Y 143
Neurotropic factors, primate brain 251
Nicotinic acetylcholine receptor, desensitization 23
Nicotinic receptor-operated channels 219
Nifedipine, effect on neurotransmitter release 69
Nigericin, effect on neurotransmitter release 67
Nipecotic acid, effect on GABA release 76, 461
Nitrendipine, effect on neurotransmitter release 69
Nociceptive afferents 400
sensitization 403, 404, 406
Nociceptive neurons, central 401
Nociceptive system, hyperalgesia 397–421
Nocifensor nerves 409
Node density, transitional zone 291
Non-neuronal enolase 527
Noradrenaline
containing nerves, bat cerebral arteries 485, 495
effect of neuropeptide Y on release of 143
effect on GABA release 471

Oculomotor nerve 278
Oligodendroglial cells
2′,3′-cyclic nucleotide 3′-phosphodiesterase 545
myelin-associated glycoprotein 548
Osmoregulation, role of taurine 472
Ouabain, effect on GABA and taurine release 464, 467
Ovariectomy, lordosis behaviour 425
Oxidative damage, cerebral aging 601–609

Pain, cutaneous hyperalgesia 397–421
central nociceptive neurons 401
neuropathic 413
primary nociceptive afferents 400
referred 399
Pancreas, neuropeptide Y 134
Parkinson's disease
anticipatory postural adjustments 51
antioxidant therapy 604
neural transplantation 634
Pentobarbital, effect on GABA release 467
Personality traits, steroid/$GABA_A$ receptor interactions 388
Phasic activity, vasopressin neurons 4
Phenacemide, effect on GABA and taurine release 468
Phenylalkylamines, effect on neurotransmitter release 70
Phospholipases, reactive oxygen species formation in brain 602
Physostigmine salicylate, effect on ketamine-induced linguo-pharyngeal events 576, 595
Pituitary, neuropeptide Y binding sites 142
Plateau potentials, vasopressin neurons 5
Postsynaptic potentiation 19
Posture
anticipatory adjustments 36, 42, 44
body scheme 43
central organisation 48
equilibrium maintenance 38, 42
fixed versus flexible synergies 44
modular approach 37
reactional adjustments 37, 44
stabilization of position 40
Potassium
desensitization 22
stimulated GABA release 463
stimulated taurine release 462, 463, 466
Potassium channel 210
A channel 217
anomalously rectifying 210
Ca^{2+}-dependent 216
M channel 215
multiplicity and properties 210, 215, 216
receptor-mediated modulation 211, 215, 218
transduction mechanisms 213
Potassium channel blockers, effect on neurotransmitter release 71
Potassium currents, supraoptic neurons 11
Pregnancy, steroid/$GABA_A$ receptor interactions 388
Pregnenolone sulfate
behavioural effects 386
biosynthesis in brain 380
depression and anxiety 388
diurnal cycles 387
GABA antagonist 382

recognition sites at $GABA_A$ receptor 383
sexual function 388
stress 387
Premotor areas, postural control 51
Presynaptic autoreceptors, GABA 469
Presynaptic inhibition, interneurones 359
Primary afferent depolarization, interneurones 359
Primate brain, ontogeny of neuropeptides 231–260
Progesterone
behavioural effects 386
cognitive functions 389
metabolism in brain 380
Progesterone receptor, ventromedial hypothalamic neurons, estrogen induction 431
Prolactin, expression in ventromedial hypothalamic neurons 431
Proprioceptors, interneurones
distribution 339
functional subdivision 341
Ia inhibitory 343
morphology 340
motor synergies 347
multimodal input 341
network of neurons 362
selection 342
Prostaglandins, heat hyperalgesia 407
Prostigmine, desensitization 23
Protein kinase C
Ca^{2+} channel current 207
role in GABA release 467
Protein kinases, modulation of Ca^{2+} channels 207
Proteins
14-3-3, gene expression 535
astroglial cells 527
2′,3′-cyclic nucleotide 3′-phosphodiesterase 527, 545
glial fibrillary acidic protein 544
myelin-associated glycoprotein 548
S-100, gene expression 537
synthesis in brain, cell-free translation systems 527
Proteolipids, myelin 511
PYX1 and PYX2 149

Reactional postural adjustments 37, 44
Reactive oxygen species 601
age-related alterations 604
aging 606
excess formation in brain 603
mitigation of cerebral oxidative stress 603
properties and measurement 602
Recurrent inhibition, Ia inhibitory interneurones 345
Referred hyperalgesia 399, 412
Referred pain 399
Reflexes, interneurones 347, 357
Regeneration
corticospinal tract 195
target-deprived CNS axons 620
Renshaw cells, Ia inhibitory interneurons 345
Reperfusion injury, formation of reactive oxygen species 603
Respiratory movement 38
Respiratory tract, neuropeptide Y 127
Retrograde labelling techniques 96
Rhythmic activity, Ia inhibitory interneurons 347
Ribonucleic acid, complexity in brain 523
cell-free translation system 526
Ribonucleic acid polymerases, brain nuclei 524
Ro15-1788, binding in kainic acid-induced limbic seizures 329
Rootlets, transitional zone 293
development 305

Schwann cells, transitional zone 272, 310
Seizures
reactive oxygen species in brain 603
steroid/$GABA_A$ receptor interactions 389
Senescence, oxidative damage in brain 606
Sensitization, cutaneous hyperalgesia 402, 411
Serotoninergic system, development in chick brain and spinal cord 93–123
Sexual behaviour, effects of estrogen 425
Sexual function, steroid/$GABA_A$ receptor interactions 388
Sigma receptors, neuropeptide Y interaction 151
Skin, hyperalgesia 397–421
Slow potentials 8
Sodium
effect on excitatory amino acid-evoked release of neurotransmitters 59, 66, 76
effect on GABA and taurine release from brain slices 463
Sodium/calcium exchange 73
Sodium currents, supraoptic neurons 10
Sodium pump, effect of reactive oxygen species 603
Somatostatin
effect on anomalously rectifying K^+ channel 212
effect on Ca^{2+} channel 207
effect on nicotinic current 219
modulation of M K^+ channel 215
primate brain
correlation with other transmitter systems 244
distribution in adult 236
gene for 243
immunohistochemistry 236, 238
ontogeny 237
radioimmunoassay 236, 237
receptors 244
Spastics, postural networks 48
Spike triggered averaging 337
Spinal arbors, corticospinal axons, development 187
Spinal cord
development of 5-HT positive cells 100
development of 5-HT positive fibres 102
distribution of 5-HT positive fibres in chick after hatching 105
5-HT pathway formation 100
neuropeptide Y 145
transient increase in density of 5-HT fibres 117
Spinal interneurons 336
Spinal motor nuclei, distribution of 5-HT positive fibres 106

Spinal nerves, transitional zone
development 305
morphology 276
Spot 35 527
gene expression 533
Steroidogenesis, defects in 390
Steroids, CNS, modulators of $GABA_A$ receptor 379–395
Stomach, neuropeptide Y 133
Stress, steroid/$GABA_A$ receptor interactions 387
Striatal excitotoxin lesion model 612
Striatal transplants 612
afferent connections from host brain 616
behavioural effects 631
clinical perspectives 634
donor tissue dissection and implantation 613
efferents to host brain 625
internal organization 614
Striatum, neuropeptide Y 136
Substance P
effect on nicotinic current 219
hyperalgesia 409
immunoreactive nerves, bat cerebral arteries 486, 496
primate brain
correlation with other transmitter systems 249
distribution in adult 247
immunohistochemistry 247, 248
ontogeny 248
radioimmunoassay 247, 248
Substance P fibres, in spinal cord during development 117, 118
Subtantia nigra, primate, development 235
Superoxide anion, formation in brain 602
Supplementary area, postural control 51
Supraoptic neurons
membrane properties 3
voltage-dependent ionic currents from 10
Sympathetically maintained pain 413
Synapsin I 20
Synaptogenesis, primate brain 234, 235

Taltrimide, effect on GABA and taurine release 468
Tardive dyskinesia, ketamine-induced rat model 571–600
Taurine, release from brain slices 455
developmental changes 471
drug effects 467
effect of excitatory amino acids and agonists 466
methodology 456
modulation by catecholamines 471
presynaptic autoreceptors and heteroreceptors 469
regulation of cell volumes 472
spontaneous 461
stimulated 462
Temperature, desensitization 21
Tetanus toxin, effect on GABA and taurine release 468
Tetrahydrodeoxycorticosterone
behavioural effects 386
pregnancy 389
stress 387
Tetrahydroprogesterone
behavioural effects 386
cognitive functioning 390
GABA agonist 381
pregnancy 389
stress 387
Tetrodotoxin, effect on neurotransmitter release 68
Thalamus, input to striatal implants 619
Thienyl-cyclohexyl-piperidine, induced linguo-pharyngeal events 589
α-Tocopherol, in brain 604
Tongue contractions, ketamine induced 571–600
Trachea, neuropeptide Y 127
Transitional zone 261–316
astrocytes 265
central tissue projection asymmetry 290
cranial nerves 278, 308
development 303

node density 290
Schwann cells 272
spinal nerves 276, 305
structure 263
structure–function correlates 296
supporting tissue 293
Transplants, intrastriatal 611–639
Trigeminal nerve, transitional zone 281
Trochlear nerve, transitional zone 281
Tympanic cavity, bats 483

Urogenital tract, neuropeptide Y 132

Vagal transitional zone
astrocytes 266
development 309
morphology 282
Valinomycin, effect on neurotransmitter release 67
Vasoactive intestinal polypeptide
immunoreactive nerves to bat cerebral arteries 485, 495
primate brain
correlation with other transmitter systems 250
distribution in adult 249
gene for 250
immunohistochemistry 249, 250
ontogeny 250
radioimmunoassay 249, 250
Vasoconstriction, neuropeptide Y 128
Vasodilation, cutaneous hyperalgesia 409
Vasopressin neurons
action potentials 4
ionic conductances 9
passive membrane properties 2
phasic activity 4
plateau potential 5
potassium currents 11
sodium and calcium currents 10
Ventromedial hypothalamic neurons, lordosis behaviour 424
estrogen effects 426
morphological correlates 438
neuropeptide synthesis 431

protein trafficking 429
synaptic effects 432
Verapamil
effect on GABA and taurine release 465
effect on neurotransmitter release 70
Veratridine
amino acid neurotransmitter release 64
effect on GABA release 464
Vertebrobasilar system, bat brain, arterial supply and innervation 484, 505
Vestibular nerve, transitional zone, morphology 282
Vimentin positive glial processes 181
Voltage-dependence, desensitization 22
Voltage-dependent ionic currents, supraoptic neurons 10

Wallerian degeneration 514
Wide-dynamic-range neurons 401
